Photo 1: Grab Bars: Factory-installed 1.50-inch diameter, concealed attachment, 18 gauge, #304 brushed stainless steel grab bars. Concealed attachment design provides tamper-resistance and minimizes debris collection areas at contact points, compared to common exposed flange bar designs, without compromising bar attachment integrity. (Reinforced areas include a structural core material encapsulated in FRP composite.)

Photo 2: REMOVABLE In-Tub Seat: Factory-installed stainless steel (back wall) bracket provides stable and secure locking for removable slatted bench seat. The individual seat slats are a molded, non-porous plastic linked together by a slat-to-slat hinge mechanism. The seat articulates for easy insertion and removal from bracket and folds for convenient storage. (Bracket reinforced area is a structural core material encapsulated in FRP composite.)

Photo 3: Shower Curtain Rod: Factory-installed 1.00-inch diameter, concealed attachment, 18 gauge, stainless steel shower curtain rod with polished finished.
